PROFESSIONAL SUMMARY

7+ years of experience as a full-stack developer, contributing through a systematic and empirical approach to problem-solving, with a strong focus on system design and delivering clean, reusable, and performant code.

SKILLS

System Design | Python | Javascript | Typescript | HTML | CSS | Django | FastAPI | pandas | Node.js | Next.js
EC2 | ECS | S3 | Lambda | Kinesis | Batch | MWAA | RDS | SQS | ECR | Postgres | MySQL | DynamoDB
Kustomize | Terraform | Git | GitHub Actions | Argo | Airflow | Snowflake | Docker | Grafana | K8S

WORK EXPERIENCE

7+ years

G2, Bangalore

Dec 2022 - Present

Sr. Software Engineer / Data Platform Engineer

- **Led a platform team** of 3 to enrich the data ecosystem, improving overall data orchestration, quality, monitoring, discovery and governance with tools such as **Argo Workflows, Airflow, Secoda**
- Migrated 'G2 Grid' scoring workflows from Ruby to Python stack, improving the **labor costs by over 50%**
- Designed & developed a number of web crawling microservices to improve **scale (from 30 to 10 days), reliability (from 3 to 30 days / failure) and maintenance efforts (from 20 to 2 hours / month)**

SprintFour, Remote

May 2018 - Present

Software Engineer (Contract)

- **Led a team** of 4, conducting sprint ceremonies, and learning & mentoring sessions
- Collaborated with **10+ clients** to gather requirements and triage issues
- Reduced **labor costs by 5x**, by automating image segmentation workflow end-to-end

Spoonshot, Bangalore

May 2022 - Oct 2022

Sr. Software Engineer

- Identified **improper usage & redundancies** in **React JS web** codebase, improving the **release package size & time to build** by over **50%**, and documenting the proper usage and setting up a periodic review cadence
- Ideated, designed & developed a **browser extension** for internal as well as external consumers to easily **search & analyse** about any F&B related keyword on any website, improving the **speed and usability**
- Improved team's coding standards through **dev guides, release playbooks, and learning sessions**

Walmart Labs, Bangalore

Apr 2019 - May 2022

SDE III

- Led **bug triaging** – identification, prioritization & resolution – in collaboration with the QA team
- Designed & developed **50+ modules**, such as **SSO auth, data dashboards, cron jobs**, etc.
- Customized **logging** in the **Scala Play** REST API service to **dynamically change the config** at runtime

Polymorph, Bangalore

May 2018 - Apr 2019

Software Engineer

- Integrated **pandas** and **Postgres DB** in the data processing layer, reducing **response time** by over **30%**
- Improved core API **code coverage** from **67% to 96%**, including it in CI/CD pipeline to boost reliability
- Migrated legacy analytics service to **React JS web**, improving **modularity** and **performance**

EDUCATION

IIIT, Jabalpur

2014 - 2018

Computer Science & Engineering, Bachelor of Technology
